

SENIOR PROJECT ROAD MAP

Step 1

Application Process: Consult the coordinating faculty, with a brief proposal by the midterm week of the preceding semester, i.e., the semester before you intend to start the senior project.

The brief proposal must outline what the student intends to do as their senior project and how it is related to his/her area of study.

The workplace supervisor must be identified and designation provided.

Step 2

Approval from the department should be provided before the final exam week of the running semester.

Step 3

Students will register for the senior project

Step 4

By the first week of the semester students should start working on the project. During this work period, the student should have five meetings with the academic supervisor. E-mail report on each meeting is preferable.

Step 5

Report writing on the project:

Report writing should be done and submitted by the last class of the semester.
